

Teddy is an easy doing buck that has always been paddock raised and produces very correct and good style kids. We have used him here extensively this year (2014) and are delighted with his kids. He is an attractive stylish buck that shows depth and spring of rib, good shoulder and rump. In winter he has a rather thick warm undercoat that clears to smooth short hair in summer. His sister and half sisters are excellent mothers, with excellent milk and udder shape, and manage to hold their condition even in difficult conditions

His sire Tony, was purchased as a weaner buck, used extensively here and then sold to a very large breeder of commercial meat goats in Australia. This breeder was so pleased with the progeny, he came back and bought more of this line the following year. His dam was a stylish doe with remarkable meat qualities and particularly good length and rump muscling

Doe CA1FE0015 sired by Tony, showing substance and meat production. Good mother, and easy doing doe.
